PROFILE

Full Stack Developer with hands-on experience building MERN stack applications, including real-time communication platforms and AI-integrated tools. Skilled in React, Node.js, and MongoDB, with a strong foundation in RESTful API design, authentication, and scalable database schemas. Eager to contribute to a dynamic engineering team as a Graduate Engineer Trainee / Software Engineer..

EXPERIENCE

EduTantr

Dec 2025 – Mar 2026

Full Stack Developer Intern

- Gained hands-on exposure to frontend and backend development using JavaScript and related web technologies
- Practiced developing web application features through coding exercises and technical assignments.
- Strengthened understanding of REST APIs, database operations, authentication, and CRUD concepts.
- Improved debugging and problem-solving skills through practical development exercises.

PROJECTS

Real-Time Chat & Video Calling Platform(Streamify)

- Built a real-time chat and video calling platform using React.js, Node.js, Express, MongoDB, and Stream SDK, deployed on Render
- Integrated JWT authentication and RESTful APIs for users, messages, and calls
- Managed async state using TanStack Query ensuring efficient caching and real-time UI updates (seen messages, typing indicators)
- Implemented media sharing and call recording with support for concurrent users

AI Interview Preparation Platform (AI Interview)

- Engineered a full-stack Interview Preparation Platform with a state-driven interview workflow and a separate NLP microservice built in FastAPI, integrating TF-IDF and cosine similarity algorithms for automated response evaluation, enabling near real-time interview score generation.
- Implemented JWT-based authentication with httpOnly cookies across platform modules, mitigating XSS vulnerabilities and strengthening session security; extended the auth layer with role-based access control protecting private API routes across frontend and backend.
- Developed multiple RESTful API endpoints orchestrating communication across frontend, backend, and NLP microservice layers incorporating input validation, modular error handling, and MVC architecture for reliable, maintainable data flow

SKILLS

Frontend : React.js, Redux Toolkit, Context API, JavaScript (ES6+), HTML5, CSS3, SASS/SCSS, Material-UI

Backend : Node.js, Express.js, Java, EJS (Templating), RESTful API Design, JWT Authentication

Databases : MongoDB, Mongoose, MySQL

Tools & DevOps : Git, GitHub/GitLab, Webpack, AWS, Babel, Postman

Fundamentals : Data Structures & Algorithms (DSA), Time & Space Complexity Analysis, DBMS Concepts (Normalization, Indexing), Networking

CERTIFICATIONS & ACHIEVEMENTS

- Inter-Institute Coding Competition — Participant, hosted by Seacom Engineering College (2024)
- Ethical Hacking — Certificate of Training, Internshala
- Solved 50+ problems on LeetCode across arrays, strings, and hashmaps

EDUCATION

Master of Computer Applications (MCA)

Seacom Engineering College| CGPA: 7.32 (provisional, final semester result awaited)

July 2024 – July 2026

Howrah, West Bengal

Bachelor of Computer Applications (BCA)

George College | CGPA: 8.74

July 2020 – Aug 2023

Kolkata, West Bengal
